Really liked the story and the choices. Played once as a good guy and my last playthrough as an evil kill-everything mage.. Devs are trash. Game is good.

If you don't care about the story or achievements at all, go for it, it's a fun bullet hell shmup with a great soundtrack.

End cutscene is broken, no end cutscene = no achievements for beating the game.

People are also having trouble running the game at all.

Devs are gone and don't care at all.. One of the greatest multiplayer games ever. Fantastic gameplay!. I have played many puzzle games, along with many other games and if not wright off the bat, some time in you understand the puzzle or game in that you become aware of the type of logic the creators of the game are using but this game wright from the start was very confusing but i gave it a try i played for another 14 minutes and the logic process was barely there and the rest was just guess work, i do not recommend this game they need to go back and rework the logic indicators for the game. I have uninstalled this game.. pros:

- First Pirate Game on Vive
- Ship Battles are awesome, and immersive
- SOme cool features like sea monsters etc

cons:

- linear story line and very short
- Graphics very bad, like nintendo 64

i had a great time in this game because i love piracy and because the vive needs more games, so i liked this one, of course you play it only for the vr, but its awesome, i hope the devs improve the game

Nice small VN in AliceWonderlands setting I enjoied playing with my younger sister.

On the plus side:

- Story is interesting and coherent to initial book atmosphere
- Graphics are fair for the genre

Cons:

Battle is not my fruit here

Scaling of text is kind of unusual

Clicking only on buttons rather than whole screen seems strange.

Overall, nice experiecne.. Dear Developers.

The game is so far well done but there is also shadow in the sun.

At start it is nearly impossible to reach the language menu. It's to far away. The voice acting is not well implemented according to lip movement.

Another thing is, please don't provide any things you can't interact with or are useless. That destroys the game atmosphere.

When the game starts there are about three icons to click on the mars surface in the briefing room. But nothing happens if I try to click the icons with my "hands".

So again. It is really boring when things are around only for being there and with no interaction.

In the current status a price from about 10 \u20ac is ok for what someone gets. But 15\u20ac is really overpriced due to the duration of 2hrs.

I will give it 6 stars out of 10.

. I've spent way too much time playing this game..... 100 hours in... level 195. This game has been a great experience and continues to be every time I play it. The gauntlets at high level, while hard to find a group to do them with, are incredibly challenging and need a great deal of strategy to defeat. Story mode is great for a quick farm, or leveling (currently on insane difficulty, extremely hard to progress.) The Community is great as well, don't let the few so-so people that don't like anyone throw you off. Being able to hang out with the dev after each patch is amazing as well, being able to see what the plans are for the future, and getting those hard to answer questions answered. 100/10, Will continue playing. Cmon guys, it's free to play. Might as well give it a try!. This game would have been great - if it was released 15 years ago. As it stands, its a mundane rts with annoyingly dark areas (hence the name) no voiceovers (not even interface feedback), and poor story. As rts go, this was surpassed long ago.. "Ability to create your own games with no programming knowledge required."

No. This program doesn't have that at all, instead it has a link to their website, where you get to use a clunky and unintuitive browser-based interface (hope you like big disclaimer boxes popping up in the way every time you try to do anything!) that doesn't even work correctly with Chrome.. A huge improvement from Ironclads. Great graphics. Great performance. Great fun. Great game. But keep in mind that all this is true ONLY for real fans of turn-based board games and hardcore sims.

Overall in the time I've played, its a great game. I'd recommend it to any althistory buff or anyone who wants to try something new that has a little dab of strategy alongside action. For the current price, I don't see why you wouldn't buy it (Distant Guns 1.5 - Pro Edition \$49.99, Jutland - Pro Edition \$49.99, War in the Pacific - Admiral's Edition \$79.99 etc.). A very moving and emotional experience. I am a game designer as a hobby, and, watching this - truly made me feel inspired, hell I even cried during parts of it. Games personally, are my life, and have been my life for many many years since I was a little kid. Thank you for putting this up, this was truly, one of the best purchases I have ever made on steam.. Absolutely love it, the maneuverability of the whole experience, the quality of the rolling stock modelling,

But there are some annoying little details that I hope Dovetail could see.

The Mk1 BG Coaches in the late 70s, at least the majority of them, DO NOT use Commonwealth bogies anymore. Instead, they use the same B4 bogies as the Mk2.

Still cannot pull the chain to stop the train.

AND WHERE IS THE DEADMAN SWITCH OF THE CLASS 101? It should be included!

. Wow that was boring.
